

G 6/4" ELECTRIC HEATING ELEMENTS with thermostatic head and el. plug

Output: 1.2 - 3 kW

Application: hot water storage tanks, thermal stores

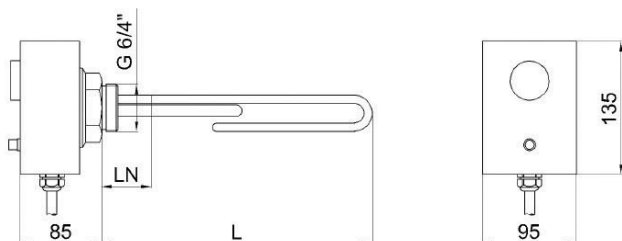

ETT-M Electric Heating Elements

Nickel-plated resistance heating elements with a longer non-heating end, with thermostatic head intended for heating of static heating water or antifreeze fluid in **thermal stores with DHW** or for drinking water heating in **hot water storage tanks**. These elements are not intended for stainless steel tanks.

They are designed to be installed in a horizontal position so that the element is completely immersed, the cable gland downwards. The power supply cable is fitted with **Uni Schuko plug**.

The elements feature a longer non-heating end (dimension LN) that permits their use for Regulux Thermal Stores with DHW.
