

## CHEMICALS FOR DESCALING CIRCULATION PUMPS

### MANTEX SNO

Cleaning solution intended for cleaning surfaces in **aluminum and aluminum alloys** using a descaling circulation pump.

Highly concentrated acid product for fast removal of scale and rust from heating radiators, heat exchangers and cooling circuits.

It is complemented with balanced quantity of inhibitors, and therefore it does not cause damage to iron metals when correctly applied.

#### Technical Data

STATE	liquid
COLOUR	colourless
ODOUR	odourless
DILUTION	1:6 to 1:10

#### Packaging

Plastic container, 10 kg

CODE - 2134

#### Application

Dilute Mantex SNO with water in the ratio about 1:10. Keep adding more Mantex SNO during cleaning until bubbles stop forming in the cleaning solution. When the solution stops forming foam, cleaning is finished.

*When cleaning is finished, flush the system with the N-105 neutralization solution which will remove any acid traces.*

#### Descaling Circulation Pumps

Pressure descaling pumps designed to remove sediments with the use of chemicals. Equipped with a 4-way valve, they facilitate cleaning solution flow reversal for the best cleaning results.

Manual pump

DOS 25 V4V

DOS 40 V4V

TARTARUGA V4V
