PHOTOVOLTAIC WATER HEATING

PHOTOVOLTAIC KIT FOR DHW HEATING

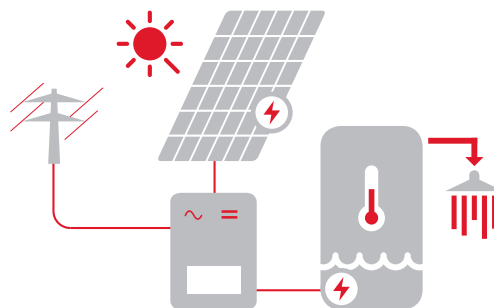

- designed to be connected to an existing hot water tank
- saves of 60-70% of annual water heating costs

Basic calculation

6 bi-facial PV panels, 450 Wp output ¹⁾
Kit for connecting panels from the roof
Inverter
DC switchboard for 1 string, disconnectors, emergency button
Roof anchors for sloping roofs
Mount kit for 6 panels in one array ²⁾
3 kW electric heating element
Extended warranty for panels, 20 years

¹⁾ Alternatively also with 4 or 5 panels.

²⁾ Alternatively in 2 arrays of 3 panels each.

If the building lacks a hot water storage tank suitable for connecting with PV panels, we can offer a RGC 170 hot water tank with the necessary accessories.
