BIO 55 MIX - BP G 1 F Load Unit

Main Features	
Application	BIO 55 MIX-BP G 1 F Insulated Load Unit is used to connect a heating system with a hydronic fireplace or solid fuel boiler and a thermal store. Heating water is mixed to OTC temperature in a 3-way valve, the return water temperature to boiler is kept at 55°C min. by a load valve in order to prevent low-temperature corrosion in the boiler. The boiler surplus output is stored in the thermal store and drawn later into the heating system if necessary.
	The Load Unit includes
	• two Grundfos UPM3 Flex AS 25-75 circulation pumps (with the possibility of control by a PWM signal or by selecting a pump performance curve)
	 TSV3BM load valve with automatic bypass balancing protecting a boiler against low-temperature corrosion by keeping the min. return water temperature to boiler at 55°C
	three-way mixing valve to maintain the required temperature in the heating circuit
	 two ball valves with drain valve for shutting off and draining the heating system
Description	 check valve integrated in the ball valve body located at the outlet from the heating system
	two ball valves and to shut off the boiler circuit
	 two ball valves permitting to shut off the thermal store circuit (included in supply)
	two drain valves to drain the load unit
	lever for ball valves
	four thermometers
	 outlets to connect a thermal store or a combination one, and alternative outlets to connect optional accessories
Working fluid	water, antifreeze heat-transfer fluid for heating systems
Installation	vertically on a wall using the installation kit
	2 x G 1" F to a heating system
	2 x G 1" F to a boiler circuit
Connections	2 x G 1" F to a thermal store
	2 x G 1/2" F alternative outlets to connect optional accessories
	(if you do not need to use the outputs, they can be plugged with the enclosed plugs)
Max. boiler output	38 kW Δt 20 K
Max. HS output	20 kW Δt 10 K
Code	17553

BIO 55 MIX - BP G 1 F Load Unit

Data for BIO 55 MIX - BP G 1 F Load Unit		
Fluid working temperature	5-95°C	
Max. working pressure	6 bar	
Ambient temperature	5-40°C	
Max. relative humidity	95%, non condensing	
Power supply	230 V, 50 Hz from external controller	
Max. load unit power input	120 W	
Insulation material	EPP RG 60 g/l	
Overall dimensions (L x W x D)	640 x 250 x 350 mm	
Total weight	16.5 kg	

Accessories *		Code
Magnet Filterball 1"	MAGNET FILTERBALL 1" Ball valve with filter and magnet	17405

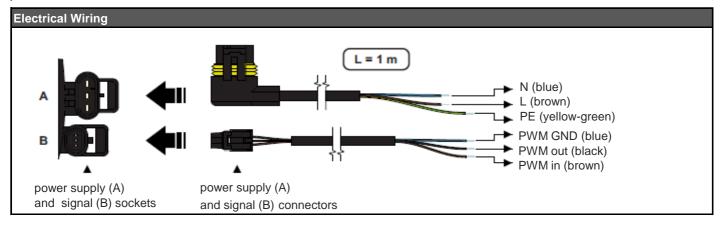

^{*} not included in supply, shall be ordered separately!

Load Unit Components

Grundfos UPM3 Flex AS 25-75 Pumps

Electric Data	
Power supply	230 V, 50 Hz
Power input (min./max.)	2/60 W
Current (min./max)	0.04/0.58 A
IP rating	IP44
Max. speed	5991 rpm
Weighted average power	≤ 28 W
Energy Efficiency Index	≤ 0,2 by EN 16 297/3
Motor protection	not needed
Min. pressure at the suction port	$0.5~{\rm m~H_2O}$ at $75~{\rm ^{\circ}C}$
to avoid cavitation	5.1 m H₂O at 95 °C

Operating Parameters	
Max. working pressure	10 bar
Max. ambient temperature	70 °C
Max. relative humidity	95 %, non condensing

BIO 55 MIX - BP G 1 F Load Unit

Selected profile display during pump operation

control button curve 1 (4 m) curve 2 (5 m) curve 3 (6 m) curve 4 (7.5 m)

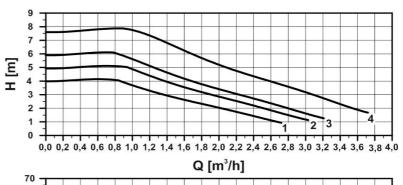

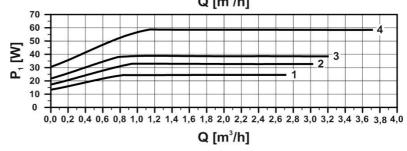

- ightarrow when the control button is pressed for less than 2 s, the currently selected curve is shown
- ightarrow with no PWM signal the pump runs at max. speed according to the selected curve
- → with PWM signal the pump speed changes with the signal value up to the maximum of the selected curve

UPM3 Flex AS 25-75 Performance Curves

Curve	Max. H	Max. P ₁
	(upper graph) (lower graph)
1	4.0 m	25 W
2	5.0 m	33 W
3	6.0 m	39 W
4	7.5 m	60 W

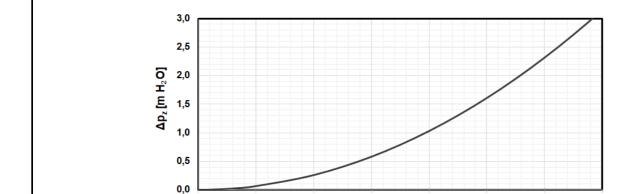

LK 840 Mixing Valve

Technical Data of LK 840 Mixing Valve		
Max. pressure difference	5 mH ₂ O	
Leak rate	difference	
Valve Kvs	6.3 m ³ /h
