

Pressure reducer, max. inlet pressure 15 bar

Pressure reducer

Main features	
Application	pressure reduction
Purpose	designed for incoming fluid pressure stabilization and reduction to a desired value
Working fluid	water, compressed air
Installation position	any position

Codes	
660	for pressure reducer with 1/2" connection
661	for pressure reducer with 3/4" connection

Technical data	
Max. working pressure	15 bar
Fluid max. working temperatur.	80 °C
Outlet pressure	1 to 4 bar
Connection size	see Dimensions

Materials	
Valve body	nickel-plated brass
Valve seat	brass
O-rings	NBR
Plastic parts	nylon

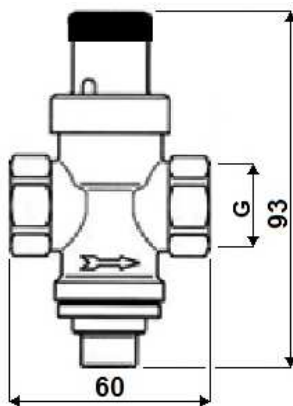

Dimensions and weight

1/2" Pressure reducer

Weight: 365 g
Connection: 2 x G 1/2" F

3/4" Pressure reducer

Weight: 380 g
Connection: 2 x G 3/4" F

Pressure drop graph
