

OV-1/2 BV-ZV Air Vent Valve

	Main Features	
	Description	The automatic air vent valve is designed to remove air from heating systems. It comes with a check valve that permits to replace the air vent valve without draining the heating system.
	Working fluid	water; water/glycol mixture (max. 1:1) or water/glycerine mixture (max. 2:1)
	Installation	at the highest point of a heating system; only vertically with the cap upwards
	Code	18511

Technical Data	
Max. working temperature	110 °C
Max. working pressure	10 bar
Total weight	145 g
Connection	G 1/2" M

Materials	
Housing	brass
Cap	brass
Seal	EPDM
Cap spring	stainless steel

Dimensions
