

Manual Filling Pump

Main features	
Description	manual top-up pump designed for topping up heating and solar thermal systems with fluids
Installation	the right position is such when the suction ball valve points upwards (see Dimensions)
Working fluid	water, water-glycol mixture (max. 1:1), cleaning and protective fluids for heating systems
Code	15 111

Technical Data	
Max. working pressure	6 bar
Filled volume (per push)	25 ml
Weight	0.98 kg

Materials	
Pump body, piston, nut	nickel-plated brass
Ball valves	nickel-plated brass
Spring	stainless steel
Retaining ring	steel
O-rings	EPDM 70
Check valves	HOSTAFORM
Threaded ball (handle)	DUROPLAST
